BELIDA B.V.

Directors' report

The Board of Managing Directors herewith submits the Financial Statements of Belida B.V. for the financial year ended March 31, 2016

Summary of activities

The Company's principle activity is as non-operating partner in the Belida Exploration Block engaged in the identification, drilling and testing of potential hydrocarbon-bearing structures in the block.

Result for the year

The loss for the financial year starting from April 1, 2015 through March 31, 2016 amounted to USD 649,785. In the previous financial year the loss amounted to USD 493,357.

Going concern

It is intention of the shareholder and the Group to continue the financing of the Company for the next twelve months.

Risk Management Policy

General

The main financial risks the Company is exposed to are the currency risk, the interest rate risk, the liquidity risk and the credit risk. The group's financial policy is aimed at mitigating the impact of currency and interest rate fluctuations on the result in the short term and to follow the market exchange rates and market interest rates in the long term. The group uses financial derivatives to control financial risks linked to business operations at control. By using financial derivatives the group takes no speculative positions.

(a) Currency risk

The group's transactions and financials statement are in American Dollars, As such the group has not faced a need for hedging such risks.

(b) Interest rate risk

The policy in respect of interest rate risk is aimed at mitigating the interest rate risks originating from the financing of the group and optimizing the net interest expenses at the same time. This policy translates into a desired profile of fixed-interest and variable-interest positions including cash, with which in principle the variable-interest position does not exceed 100% of the net liability.

(c) Credit risk

The Group mitigates the credit risk by exclusively engaging with financial institutions and debtors with high creditworthiness.

For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted.

(d) Liquidity risk

Periodically, Liquidity budgets are prepared. Liquidity risks are controlled through interim monitoring and possible adjustments. The liquidity budgets take account of restricted availability of cash, among which bank guarantees and margin calls in respect of derivatives concluded.

BELIDA B.V.

Directors' report (continued)

(e) Derivative Instruments

In order to hedge its exposure to interest rate and commodity price risks, the Group enters into forward, option, swap contracts and other derivative financial instruments. The Group neither hold nor issue any derivative financial instruments for speculative purposes.

Health, Safety and Environment (HSE) Policy

The Management of the Company firmly believes that good HSE performance is in the best interest of the Company's long - term success and is committed to achieve excellence in the performance of HSE in its activities.

Future developments

General

The Company has no immediate intention to change its business. As the Company commenced identification, drilling and testing of potential hydrocarbon-bearing structures, future results will largely depend on income generated under the production sharing contract.

Personnel development

The average number of employees during the year was nil. The Company does not expect to employ any personnel during the coming year.

Finance development

The Company does not expect that the method of finance will significantly change during 2016/2017.

Post balance sheet events

On March 31, 2016 the shareholder entered into facility agreement with a consortium of Banks (ANZ Bank and Axis Bank Limited) to refinance its existing term loan facility against which a financial guarantee of USD 46,000,000 has been provided by the ultimate shareholder. The refinancing was effected on April 20, 2016.

Due to refinancing the Existing Facility Agreement the security granted by the shareholder to ANZ bank under the Company's share pledge was released on April 29, 2016. As a result of the refinancing the bank guarantee in the amount of USD 69,000,000 as surety for the repayment of borrowings entered into by the shareholder was cancelled on April 29, 2016. By entering into the New Facility Agreement which was effected on April 20, 2016 the shareholder of the Company has granted a right of pledge over all the shares held in the Company's shares to a consortium of Banks (ANZ Bank and Axis Bank Limited), which was executed on April 29, 2016.

No other major post balance sheet events affecting the financial statements have occurred to date.

The Board of Managing Directors,

Atanu Guha

Notes to the balance sheet and income statement (in USD)

1 GENERAL

Belida B.V. (hereinafter "the Company") is a Dutch private company with limited liability, incorporated in Rijswijk on February 12, 2008 and currently has its office address at Naritaweg 165, 1043 BW, Amsterdam, the Netherlands. The Company's principle activity is as non-operating partner in the Belida Exploration Block engaged in the identification, drilling and testing of potential hydrocarbon-bearing structures in the block.

The functional currency of the Company is US Dollars (USD) as most transactions are denominated in USD. Also, the Dutch tax authorities granted the Company USD as currency for filing the Corporate Income Tax return. The financial statements are denominated in USD.

(a) Group structure

The Company is wholly owned by Dian Energy B.V., the Netherlands. The ultimate parent of the Company is Tata Petrodyne Limited. The financial statements of the Company are included in the consolidated financial statements of Tata Petrodyne Limited of Mumbai, India.

(b) Joint ventures

The Company holds a 14% participating interest in the Belida Exploration Block in the Republic of Indonesia. This interest qualifies as a joint venture as the venturers have joint control over the Production Sharing Contract. The joint venture consists of joint operations with respect to the operation of an oil field in Indonesia. In accordance with the Guidelines for Annual Reporting the company has recognized its proportionate share in the joint venture of the joint assets, liabilities, expenses and revenues in its financial statements.

(c) Use of estimates

In applying the accounting policies and guidelines for preparing the financial statements, management makes a range of estimates and judgments that might be essential for the amounts disclosed in the financial statements. If necessary for the purposes of providing the view required under Section 362(1), Book 2, of the Dutch Civil Code, the nature of these estimates and judgments, including the related assumptions, is disclosed in the notes to the Financial Statement items in question. Actual amounts may differ from these estimates.

(d) Going concern

It is intention of the shareholder and the Group to continue the financing of the Company for the next twelve months.

BELIDA B.V.

Notes to the balance sheet and income statement (continued)

(in USD)

2 ACCOUNTING POLICIES FOR THE BALANCE SHEET

The accompanying Financial Statements have been prepared in accordance with the statutory provisions of Part 9, Book 2, of the Netherlands Civil Code and the firm pronouncements in the Guidelines for Annual Reporting in the Netherlands as issued by the Dutch Accounting Standards Board, taking into account the exemptions offered by the Dutch Accounting Standards Board.

In general, assets and liabilities are stated at the amounts at which they were incurred or current value. If not specifically stated otherwise, they are recognized at the amounts at which they were acquired or incurred. The balance sheet and income statement include references to the notes.

(a) Comparison with previous year

The accounting policies have been consistently applied to all the years presented.

(b) Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange prevailing at the balance sheet date. Foreign currency transactions in the reporting period are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates are recognised in the income statement.

Translation differences on non-monetary assets held at cost are recognised using the exchange rates prevailing at the dates of the transactions (or the approximated rates).

(c) Intangible fixed assets

Intangible assets are reported at acquisition value with deductions for accumulated amortisation and any impairment losses. These generally comprise of cost of licence and property acquisition, exploration expenditure, development expenditure and site restoration cost capitalised (collectively referred to as producing properties), and costs incurred to acquire computer software licences and implement the software for internal use (including software coding, installation, testing and certain data conversion). Producing properties are depleted using a unit-of-production method over proved developed reserves. Goodwill is depleted using a "unit-of-production" method over 1P reserves (Proved). Amortisation of computer software licenses takes place on a Straight Line Method ("SLM") basis over the asset's anticipated useful life. The useful life is determined based on the period of the underlying contract and the period of time over which the computer software licenses is expected to be used and generally does not exceed 10 years. Based on current estimates of useful life, computer software licenses are being amortised at a SLM rate of 25%. An impairment test of intangible assets is conducted annually or more often if there is an indication of a decrease in value. The impairment loss, if any, is reported in the Statement of Profit and Loss.

Oil and natural gas producing activities

The joint operation follows the "Successful Efforts" method of accounting for its oil and natural gas exploration and production activities. Accordingly, expenses incurred towards acquisition costs of unproved property, exploration costs of drilling and equipping exploratory and appraisal wells and drilling exploratory type stratigraphic test wells and development costs are initially capitalised on a field-by-field basis (within a block) till these are either transferred to producing properties on completion or expensed in the year when determined to be dry or of no further use, as the case may be. A field forms the cost pool in which all costs of exploration, acquisition of mineral rights and development are aggregated. Common infrastructure serving more than one field is allocated to fields based on the operators' estimates.

BELIDA B.V.

Notes to the balance sheet and income statement (continued)

(in USD)

2 ACCOUNTING POLICIES FOR THE BALANCE SHEET (continued)

Licence and property acquisition costs

Exploration and leasehold property acquisition costs are capitalised within intangible assets under development and are not depleted. Each property is reviewed on an annual basis to confirm that drilling activity is planned and it is not impaired. If no future activity is planned, the remaining balance of the licence and property acquisition costs is written off. Upon determination of economically recoverable reserves ('proved reserves' or 'commercial reserves'), the costs are aggregated with exploration expenditure and held on a field-by-field basis as proved properties awaiting approval within 'intangible assets under development – Exploration'. When development is approved internally, the relevant expenditure is shifted to 'intangible assets under development – Development' until the commencement of production at which point the costs are transferred to producing properties.

Exploration expenditure

Exploration costs of drilling and equipping exploratory and appraisal wells and drilling exploratory type stratigraphic test wells are initially capitalised as 'intangible assets under development – Exploration' on a field-by-field basis (within a block) till these are either transferred to producing properties on completion or expensed in the year when determined to be dry or of no further use, as the case may be. All wells under 'intangible assets under development – Exploration' which are more than two years from the date of completion of drilling are charged to the Statement of Profit and Loss except those which have proved reserves and the development of the fields in which the wells are located has been planned.

Other exploration costs including geological and geophysical exploration costs, expenditure incurred in connection with carrying and retaining undeveloped properties and expenditure on dry hole and bottom hole are expensed in the year in which these are incurred.

Development expenditure

Expenditure on the construction, installation or completion of infrastructure facilities such as platforms, pipelines and the drilling of development wells are capitalised and carried as part of 'intangible assets under development – Development' until commencement of production. When production commences these costs are transferred to intangible assets-producing properties as part of the costs of the field to which they relate.

(d) Impairment

At each balance sheet date, the Company tests whether there are any indications of assets being subject to impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent, if any, of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. An asset is subject to impairment if its carrying amount exceeds its recoverable amount; the recoverable amount is the higher of an asset's fair value less costs to sell and value in use. An impairment loss is recognised immediately in the income statement.

If it is established that a previously recognised impairment loss no longer applies or has declined, the increased carrying amount of the assets in question is not set any higher than the carrying amount that would have been determined had no asset impairment been recognised. A reversal of an impairment loss is recognised immediately in the income statement.

BELIDA B.V.

Notes to the balance sheet and income statement (continued) (in USD)

2 ACCOUNTING POLICIES FOR THE BALANCE SHEET (continued)

(e) Inventories

Inventories of crude oil and condensate are stated at the net realisable value i.e. the market value less costs to sell. Changes in the net realisable value are recognised in the income statement. Inventories of stores and spare parts are valued at the lower of cost and the net realisable value. Cost is determined by the "first-in-first-out" method and includes direct purchase cost, transportation and non-refundable taxes.

(f) Receivables

Upon initial recognition the receivables are valued at fair value and then valued at amortised cost. The fair value and amortised cost equal the face value. Provisions deemed necessary for possible bad debt losses are deducted. These provisions are determined by individual assessment of the receivables.

(g) Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank balances and deposits held at call with maturities of less than 12 months. Bank overdrafts, if any, are shown within borrowings in current liabilities on the balance sheet. Cash and cash equivalents are stated at face value.

(h) Financial liabilities

Upon initial recognition, the loans and liabilities recorded are stated at fair value and then valued at amortised cost.

(i) Site restoration costs

Liabilities for site restoration costs (net of salvage values) are recognised when the company has an obligation to dismantle and remove a facility such as oil and natural gas production or transportation facility or an item of plant and to restore the site on which it is located, when a reasonable estimate of that liability can be made. Where an obligation exists for a new facility, the liability is recognised on construction or installation. An obligation may also crystallise during the period of operation of a facility through a change in legislation or through a decision to terminate operations. The amount recognised is the value of estimated future expenditure determined in accordance with local conditions and requirements. The corresponding amount is added to the cost of the intangible asset and is subsequently depleted as part of the capital costs of the facility or item of plant. Any change in the value of the estimated expenditure is reflected as an adjustment to the provision and the corresponding intangible asset.

BELIDA B.V.

Notes to the balance sheet and income statement (continued)

(in USD)

3 ACCOUNTING POLICIES FOR THE INCOME STATEMENT

(a) General

Profit or loss is determined as the difference between the realisable value of the goods delivered and services rendered, and the costs and other charges for the year. Revenues on transactions are recognised in the year in which they are realised.

(b) Revenue recognition

Crude oil, commingled crude and condensate is sold to a buyer with whom a sales agreement is entered into. The revenue, where applicable, has been recognized on transfer of custody of the Group's share of crude oil, gas and commingled crude, determined on a direct entitlement basis and to refinery/others based on the price agreed by the buyer.

(c) Exchange rate differences

Exchange rate differences arising upon the settlement or conversion of monetary items are recognised in the income statement in the period that they arise.

(d) Cost of sales

Cost of sales represents the direct and indirect expenses attributable to revenue, including raw materials and consumables, cost of work contracted out and other external expenses, the employee benefits expense in respect of production staff, depreciation charges for buildings and equipment, and other operating expenses that are attributable to cost of sales.

(e) Selling expenses, and general and administrative expenses

Selling expenses, and general and administrative expenses comprise costs chargeable to the year that are not directly attributable to the cost of the goods sold.

(f) Amortization and depreciation

Intangible assets, including goodwill, are amortised. Future depreciation and amortisation is adjusted if there is a change in estimated future useful life.

Negative goodwill is released to the income statement where charges and losses occur, provided that this has been recognised in accounting for the acquisition, and these charges and losses can be reliably measured. If no expected charges or losses have been taken into account, any negative goodwill is released in accordance with the weighted average of the remaining useful life of the depreciable or amortisable assets acquired. Where negative goodwill exceeds the fair value of the identified non-monetary assets, the excess is recognised directly through profit or loss.

(g) Financial income and expenses

Interest paid and received is recognised on a time-weighted basis, taking account of the effective interest rate of the assets and liabilities concerned. When recognising interest paid, allowance is made for transaction costs on loans received as part of the calculation of effective interest.

BELIDA B.V.

Notes to the balance sheet and income statement (continued)

(in USD)

3 ACCOUNTING POLICIES FOR THE INCOME STATEMENT (continued)

(h) Taxation

Income tax is calculated on the profit/loss before tax in the income statement, taking into account any losses carried forward from previous financial years (where not included in deferred income tax assets) and tax-exempt items, and plus non-deductible expenses. Account is also taken of changes in deferred income tax assets and liabilities owing to changes in the applicable tax rates.

Deferred tax is calculated to correspond to the tax effect arising when final tax is determined. Deferred tax corresponds to the net effect of tax on all timing differences which occur as a result of items being allowed for income tax purposes during a period different from when they were recognised in the consolidated financial statements. Deferred tax assets are recognised with regard to all deductible timing differences to the extent that it is probable that taxable profit will be available against which deductible timing differences can be utilised. When the company carries forward unused tax losses and unabsorbed depreciation, deferred tax assets are recognised only to the extent there is virtual certainty backed by convincing evidence that sufficient future taxable income will be available against which deferred tax assets can be realised. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced by the extent that it is no longer probable that sufficient taxable profit will be available to allow all or a part of the aggregate deferred tax asset to be utilised.

4 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

General

The main financial risks the group is exposed to are the currency risk, the interest rate risk, the liquidity risk and the credit risk. The group's financial policy is aimed at mitigating the impact of currency and interest rate fluctuations on the result in the short term and to follow the market exchange rates and market interest rates in the long term. The group uses financial derivatives to control financial risks linked to business operations at control. By using financial derivatives the group takes no speculative positions.

(a) Currency risk

The group's transactions and financials statement are in American Dollars, As such the group has not faced a need for hedging such risks.

(b) Interest rate risk

The policy in respect of interest rate risk is aimed at mitigating the interest rate risks originating from the financing of the group and optimizing the net interest expenses at the same time. This policy translates into a desired profile of fixed-interest and variable-interest positions including cash, with which in principle the variable-interest position does not exceed 100% of the net liability.

(c) Credit risk

The Group mitigates the credit risk by exclusively engaging with financial institutions and debtors with high creditworthiness.

For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted.

(d) Liquidity risk

Periodically, Liquidity budgets are prepared. Liquidity risks are controlled through interim monitoring and possible adjustments. The liquidity budgets take account of restricted availability of cash, including margin calls on bank guarantees and derivative transactions concluded.

BELIDA B.V.

Notes to the balance sheet and income statement (continued) (in USD)

4 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

(e) Derivative Instruments

In order to hedge its exposure to interest rate and commodity price risks, the Group enters into forward, option, swap contracts and other derivative financial instruments. The Group neither hold nor issue any derivative financial instruments for speculative purposes.

NON-CURRENT ASSETS

5 INTANGIBLE FIXED ASSETS

Intangible fixed assets comprise the following:

	Intangible assets under development - Exploration	Total
Acquisition or production costs	3,903,305	3,903,305
Accumulated amortisation and impairments	--	--
Opening balance	3,903,305	3,903,305
Movements 2015/2016		
Additions	14,579	14,579
Total Movement	14,579	14,579
Accumulated amortisation and impairments	--	--
Closing Balance	3,917,884	3,917,884

In 2008 the Company acquired a 14% interest in the Belida Exploration Block in the Republic of Indonesia.

6 FINANCIAL FIXED ASSETS

Movements in financial fixed assets can be broken down as follows:

	Indirect tax recoverable	Total
Opening balance	346,843	346,843
Movements 2015/2016		
Exchange differences and other movements	(42,021)	(42,021)
Closing balance	304,822	304,822

This indirect tax recoverable has been reclassified from current assets during 2014/2015 as it is deemed recoverable within 5 years or more.

Other Information

Other reserves

Subject to the provisions under Dutch law that no dividends can be declared until all losses have been cleared, the other reserves are at the disposal of the shareholder in accordance with the Company's Articles of Association.

Furthermore, Dutch law prescribes that any profit distribution may only be made to the extent that the shareholder's equity exceeds the amount of the issued capital and the legal reserves. Moreover, no distributions may be made if the Board of Managing Directors is of the opinion that, by such distribution, the Company will not be able to fulfill its financial obligations in the foreseeable future.

Appropriation of result

The loss sustained by the Company during the year under review will be debited to the other reserves. This proposed appropriation of the result has not been reflected in these financial statements and is subject to the approval of the General Meeting of Shareholders.

Post balance sheet events

On March 31, 2016 the shareholder entered into facility agreement with a consortium of Banks (ANZ Bank and Axis Bank Limited) to refinance its existing term loan facility against which a financial guarantee of USD 46,000,000 has been provided by the ultimate shareholder. The refinancing was effected on April 20, 2016.

Due to refinancing the Existing Facility Agreement the security granted by the shareholder to ANZ bank under the Company's share pledge was released on April 29, 2016. As a result of the refinancing the bank guarantee in the amount of USD 69,000,000 as surety for the repayment of borrowings entered into by the shareholder was cancelled on April 29, 2016. By entering into the New Facility Agreement which was effected on April 20, 2016 the shareholder of the Company has granted a right of pledge over all the shares held in the Company's shares to a consortium of Banks (ANZ Bank and Axis Bank Limited), which was executed on April 29, 2016.

No other major post balance sheet events affecting the financial statements have occurred to date.

INDEPENDENT AUDITOR'S REPORT

Report on the financial statements

We have audited the accompanying financial statements for the year ended March 31, 2016 of Belida B.V., Amsterdam, which comprise the balance sheet as at March 31, 2016, the profit and loss account for the year then ended and the notes, comprising a summary of the accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these financial statements and for the preparation of the Directors' Report, both in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, management is responsible for such internal control as it determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for qualified opinion

We were unable to obtain sufficient appropriate audit evidence about the company's share in the carrying amount of employee benefit liabilities relating to its foreign unincorporated jointly controlled operation Belida PSC, aggregating to USD 93,405 as at March 31, 2016, because the supporting evidence and other relevant information and explanations could not be provided to us. Consequently, we were unable to determine whether any adjustments to these amounts were necessary.

Opinion with respect to the financial statements

In our opinion, except for the possible effects of the matter described in the basis for qualified opinion paragraph, the financial statements give a true and fair view of the financial position of Belida B.V., as at March 31, 2016, and of its result for the year then ended in accordance with Part 9 of Book 2 of the Dutch Civil Code.

Emphasis of matter

We draw attention to the following:

1. Note 2 (c), (d) and (i) of the Notes forming part of the financial statements which explain the technicalities of the "Successful Efforts Method"; the treatment of exploration, development costs and the estimates of capital costs and proved reserves are significant to the oil and gas exploration and production industry.
2. Categorisation of wells as exploratory or producing, the estimates of hydrocarbon reserves, based on which depletion on producing wells is computed and the estimates for liabilities for site restoration costs are based on technical evaluations carried out by the management, on which we have placed reliance.

Our opinion is not qualified in respect of this matter.

Report on other legal and regulatory requirements

Pursuant to the legal requirement under Section 2:393 sub 5 at e and f of the Dutch Civil Code, we have no deficiencies to report as a result of our examination whether the Directors' Report, to the extent we can assess, has been prepared in accordance with Part 9 of Book 2 of this Code, and whether the information as required under Section 2:392 sub 1 at b-h has been annexed. Further we report that the Directors' Report, to the extent we can assess, is consistent with the financial statements as required by Section 2:391 sub 4 of the Dutch Civil Code.
